

Town Deal Projects

We worked closely with the community to develop an initial long list of 40 potential projects. These were then assessed using a robust project selection and management process to produce the short list of 12 projects included in our [Town Investment Plan](#).

Business cases have been developed for all the shortlisted projects which need to be formally approved by Cornwall Council as designated accountable body.

This process is currently underway and, once completed, will allow the business cases to enter the next stage, which consists of going through a rigorous assurance process led by the Council.

Following the review, the St Ives Town Deal programme and approved projects will be submitted back to the government for final approval later this summer.
